To whom it may concern:

I writing to enquire about work placement at Siemens to gain workforce experience. I would like to experience the workload and flow of projects. I would like to experience how projects are started, and how the projects are tackled throughout a work day and throughout the weeks. I am looking for experience in the IT department working with data analysis and modelling of data. I have experience with the programming languages Matlab and Python. I have experience in data analysis, taking data and turning it into insight.

I am also looking for experience in any research department. I have experience with different forms of light scattering which is used to investigate structural characterisation of materials.

I view myself as a cheerful and optimist person who enjoys working in a team environment. I am a motivated and stable worker who is looking for new challenges.

I look forward to hearing about current projects being worked on and how I can help contribute to these projects.

Sincerely,

Nathan Hugh Barr
