Dear Dorthé Gregersen:

I am writing to enquire about a visit to Rockwool, and work placement to gain workforce experience. I completed my Master's degree in Physics and Mathematics on the 7th of May and most of my work experience has been in academia and teaching. I would like to experience the day to day life of working in an international company and what types of jobs are completed over the course of the week. I am looking for experience in the IT department working with data and modelling data. I have experience with the programming languages Matlab and Python. I am also looking for experience in any research department. I have experience with different forms of light scattering which is used to investigate structural characterisation of materials. The skills that I have are in programming, mathematical modelling and experimental research.

I view myself as a cheerful and optimistic person who enjoys working in a team environment. I am a motivated and stable worker who is looking for new challenges. I look forward to hearing from you.

Sincerely,

Nathan Hugh Barr
